

# DOM

DOM events are events that occur during [DOM](#) traversal and parsing.

Event	Description
loading	The browser has received the document and is now about to do something with it.
interactive	The browser has finished parsing all of the HTML and DOM construction is complete.
content loaded	Both <a href="#">DOM</a> and <a href="#">CSSOM</a> (../c/cssom) are ready, render tree can be built, and Javascript can be executed.
complete	Processing is complete and all resources have been downloaded.
